

1 Q. Application, Page 2, states that this will be a three-year project and provides the estimated  
2 expenditures for 2024, 2025 and 2026. On page 15, section 5.1 of Schedule 1 states that it is  
3 expected to be a four-year project, commencing in 2024 with completion in 2027. Please  
4 confirm if there will be expenditures in 2027.

5

6

7 A. This project is a four-year project with capital expenditures in 2027 totaling \$1.55 million. Page 2  
8 of the application incorrectly stated there would be expenditures of about \$3.15 million for  
9 2026; however, the noted \$3.15 million represented the proposed expenditures for 2026 and  
10 2027 combined as noted in the “Beyond” column of Table 7 of Schedule 1 of the application.

11 Newfoundland and Labrador Hydro has revised the application to reflect the correct  
12 information.<sup>1</sup>
