

1 **Q. Please provide details of Newfoundland Power's monitoring and assessment plan for**  
2 **its Net Metering Service Option.**

3  
4 A. Newfoundland Power will monitor and assess its Net Metering Service Option on an  
5 ongoing basis. This will include quarterly updates to the Board as part of the Company's  
6 Quarterly Regulatory Reports. These updates will include, but are not limited to,  
7 information such as:

- 8  
9
- 10 • Number of active applications and total of the proposed generation capacity
  - 11 • Number of applications approved and the associated generation capacity
  - 12 • Number of customers who have completed interconnection of their facilities
  - 13
  - 14 • Amount of energy sold to participants
  - 15 • Amount of energy supplied to Newfoundland Power
  - 16 • Amount of the customer generation credit
  - 17 • Amount of banked (or excess) energy credits settled on the anniversary date.
  - 18
  - 19 • Monitored feedback from participants regarding the overall operation of the Net  
20 Metering Service Option.

21 Newfoundland Power will also monitor and assess the Net Metering Service Option to  
22 ensure the option remains least cost and fair to non-participants.
