| 1<br>2<br>3<br>4<br>5<br>6<br>7<br>8<br>9<br>10<br>11<br>12<br>13 | Q. | Ne<br>Bu<br>ass<br>to<br>tha<br>dis<br>Ra<br>a) | eference CA-NP-157) The RFI includes a number of questions related to<br>wfoundland Power's statement in (CA-NP-181 pertaining to the 2024 Capital<br>dget Application) " <i>if Memorial University were to be directly assigned all costs</i><br><i>vociated with its service from MUN Substation, consideration would have to be given</i><br><i>whether it remained appropriate for Memorial University to continue to pay a rate</i><br><i>a portion of costs associated with substations, transformers, and</i><br><i>tribution equipment that are used to serve other customers in the General Service</i><br><i>te #2.4 customer rate class.</i> "<br>What customers are supplied by the RFD and LCV Substations?<br>Is Memorial University, or any other customer, assigned costs in the cost of<br>service study for the LCV and RFD Substations (see CA-NP-030 Attachment A<br>relating to the 2024 CBA)? If so, how much of this cost is included in the cost of<br>service study and how much is assigned to each customer class? |
|---|----|---|---|
| 14  |    | c)  | Does the cost of service study allocate any costs for distribution facilities to the  |
| 15  |    | I)  | Rate 2.4 customer class? If so, how much?   |
| 16<br>17  |    | d)  | Are distribution facilities used to supply Memorial University and the Rate 2.4 customers served at 66kV from the RFD and LCV Substations?  |
| 18  |    | e)  | Please confirm that Newfoundland Power did not consider if the rate charged   |
| 19  |    | -)  | Memorial University remains appropriate prior to filing this GRA.   |
| 20  |    |   |   |
| 21<br>22<br>23<br>24  | A. | a)  | The customer served by the RFD Substation is the operator of an antimony mine located in central Newfoundland. The customer served by the LCV Substation is the operator of a mine located in western Newfoundland.   |
| 25<br>26<br>27<br>28<br>29<br>30<br>31<br>32                      |    | b)  | General Service Rate #2.4 is determined based on the aggregate revenue and aggregate costs to serve all of the customers in this rate class in the course of a year. Costs that can be directly attributable to a General Service Rate #2.4 customer are specifically assigned to the General Service Rate #2.4 customer rate class. This includes approximately \$0.1 million attributed to the customer served by the LCV Substation. There are no specifically assigned costs attributed to the customer served by the RFD Substation.   |
| 33<br>34<br>35  |    | c)  | Approximately \$3.8 million of Newfoundland Power's annual distribution costs are allocated to the General Service Rate #2.4 customer rate class. <sup>1</sup>  |
| 36<br>37<br>38<br>39<br>40<br>41                                  |    | d)  | Distribution facilities are not used to supply the customers served by the RFD and LCV Substations since those customers are served at 66 kV transmission voltage. Memorial University is served by distribution facilities owned by Newfoundland Power at the Memorial ("MUN") Substation. See the response to Request for Information CA-NP-267 for additional information.   |
| 42<br>43<br>44  |    | e)  | It is not confirmed. Newfoundland Power considered the appropriateness of the rate charged to Memorial University throughout 2023 as reflected in regulatory proceedings associated with the MUN Substation.  |

<sup>&</sup>lt;sup>1</sup> See Newfoundland Power's 2025/2026 General Rate Application, Volume 2 Supporting Materials, Report 4. Cost of Service Study, Schedule 1.2.

| 1  | In the Company's 2023 Supplemental Capital Expenditure Application for the                        |
|----|---|
| 2  | Memorial Substation Power Transformer Replacement (the "MUN-T2 Application")                      |
| 3  | the Company observed that the load profile of Memorial University is expected to                  |
| 4  | change substantially in the coming years. Newfoundland Power also stated that a                   |
| 5  | review of the rates charged to the University would be appropriate when those                     |
| 6  | changes materialize to ensure the University continues to pay rates that are consistent           |
| 7  | with the cost of providing it with electrical service. <sup>2</sup> Newfoundland Power reiterated |
| 8  | this point of view as part of the Company's 2024 Capital Budget Application. <sup>3</sup>         |
| 9  |   |
| 10 | In its order approving Newfoundland Power's 2024 Capital Budget Application, the                  |
| 11 | Board also recognized that it will be appropriate to review the rates charged to                  |
| 12 | Memorial University when more information is known about the anticipated changes                  |
| 13 | in its load profile and when the ongoing rate design review by Newfoundland Power                 |
| 14 | is completed. <sup>4</sup>  |
