

1 Q. When does Hydro anticipate it will file for approval of a revised wholesale rate structure, either  
2 on an interim or final basis?

3

4

5 A. Newfoundland and Labrador Hydro (“Hydro”) is currently working with Newfoundland Power  
6 Inc. to assess the possibility of updating the wholesale rate structure in advance of Hydro’s next  
7 general rate application (“GRA”) in a manner suitable for both utilities and without  
8 disadvantaging any customer class.

9 If it is determined that there is a viable option, Hydro will apply to update the wholesale rate  
10 later this year. If an advanced application is not feasible, Hydro will file for approval of an  
11 interim revised wholesale rate structure shortly after filing the GRA.
