Attention: Mike McNiven  
Board Secretary

**Re: Net Metering Program Annual Report**

Please find enclosed Newfoundland and Labrador Hydro's ("Hydro") Net Metering Program Annual Report. This report is filed in compliance with Board Order No. P.U. 17(2017), wherein the Board of Commissioners of Public Utilities directed Hydro to file annual progress reports on its Net Metering Program including application and take-up rates, total customer generation installed, associated costs, and any other relevant information.

Should you have any questions, please contact the undersigned.

Yours truly,

**NEWFOUNDLAND AND LABRADOR HYDRO**

# Net Metering Program Report

For the Year Ended December 31, 2025

April 1, 2026

A report to the Board of Commissioners of Public Utilities

## **Contents**

1.0	Introduction .....	1
2.0	Net Metering Program .....	1
3.0	Net Metering Program Costs .....	2
4.0	Conclusion.....	2

**1 1.0 Introduction**

2 On May 18, 2017, in Board Order No. P.U. 17(2017), the Board of Commissioners of Public Utilities  
 3 (“Board”) approved Newfoundland and Labrador Hydro’s (“Hydro”) proposal for a Net Metering  
 4 Program. Effective July 1, 2017, the Net Metering Program allows Hydro’s customers to generate power  
 5 for their own use from small-scale renewable generating facilities of 100 kW or less and supply any  
 6 available surplus power to Hydro.

7 In Board Order No. P.U. 17(2017), the Board further ordered Hydro to file an annual progress report on  
 8 the Net Metering Program, including application and take-up rates, the total amount of customer  
 9 generation installed, associated costs, and any additional relevant information.

10 Newfoundland Power Inc.’s (“Newfoundland Power”) application for a net metering option was also  
 11 approved in Board Order No. P.U. 17(2017). Between the two net metering options, there is a provincial  
 12 total limit of 5 MW of generation installed.

**13 2.0 Net Metering Program**

14 Hydro approved two net metering applications in 2025, which subsequently expired.<sup>1</sup>

15 In total, Hydro has three approved net metering customers with a total capacity of 71.6 kW. In 2025,  
 16 these customers generated a total of 51,084 kWh, with 19,987 kWh supplied to Hydro in Table 1.

**Table 1: 2025 Net Metering Customer Data**

System	Customer Reference	Total Generation (kWh)	Energy Supplied to Hydro (kWh)	Approximate Credit for Supplied Energy (\$)
Island Interconnected	Roberts Arm (10 kW Solar)	9,241	4,561	757
Island Interconnected	Milltown (13.6 kW Solar)	11,504	7,186	1,050
Isolated Diesel	Makkovik (48 kW Solar)	30,339	8,240	1,977

---

<sup>1</sup> Net metering approvals issued by Hydro are valid for six months.

1 **3.0 Net Metering Program Costs**

2 Hydro's costs associated with the administration of net metering totalled approximately \$7,200 in 2025.

3 Hydro's total cost to date is \$32,000.

4 **4.0 Conclusion**

5 Hydro continues to monitor its customers' contributions within the provincial Net Metering Program  
6 limit of 5 MW. To date, the aggregate capacity of the applications approved by Hydro is 71.6 kW. Hydro  
7 has three approved net metering customers. Hydro notes that Newfoundland Power has approved net  
8 metering applications totalling 1,115.5 kW.<sup>2</sup> The total approved capacity across both utilities is  
9 1,187.1 kW, approximately 24% of the provincial maximum of 5 MW.

---

<sup>2</sup> Newfoundland Power has installed 987.8 kW of the 1,401.6 kW approved customer owned generation projects through its Net Metering Policy. Of the 1,401.6 kW originally approved, 18 applications totaling 286.1 kW have since expired, leaving an adjusted approved amount of 1,115.5 kW. The data on Newfoundland Power's Net Metering program was provided in Newfoundland Power's 2025 Net Metering Service Option Annual Report filed with the Board on March 20, 2026.
