Re: Preliminary Estimate of the Weather-Adjusted Native Load by Newfoundland Power Inc.

Please find attached a calculation of the preliminary estimate of the Weather-Adjusted Native Load of Newfoundland Power Inc. ("Newfoundland Power") for 2025 billing (Schedule 1). Note that this estimate is before the reduction of the Generation and Curtailable credits.

For the period from December 2024 through February 2025, Newfoundland Power's Maximum Native Load occurred on Thursday, January 23, 2025 at 8:06 a.m. and was 1,429,407 kW. Based on a preliminary estimate, the Weather-Adjusted Native Load for this winter period is 1,457,658 kW. A final calculation of the Weather-Adjusted Native Load will be forwarded by April 5, 2025.

Should you have any questions, please contact the undersigned.

Yours truly,

NEWFOUNDLAND AND LABRADOR HYDRO
