

1 Q. **Reference: Implementation of the Rate Mitigation Plan Report, pages 9-11.**

2 In Order No. P.U. 6 (2021), the Board approved Hydro's proposal to dispose of a balance owing
3 to the Industrial customers via a one-time bill credit rather than implementing a customer rate
4 decrease.

5 Would Order in Council OC2024-062 preclude a similar bill credit approach being used to
6 dispose of the \$20 million owing to Newfoundland Power associated with the Rural Rate
7 Adjustment balance? If Order in Council OC2024-062 does not preclude a one-time bill credit,
8 would Hydro consider taking such an approach? If not, why not?

9

10

11 A. Please refer to Newfoundland and Labrador Hydro's response to PUB-NLH-001 of this
12 proceeding.
